Please note updated room location.

Hi everyone:

I wanted to schedule this meeting to discuss items needed to move forward on the planned removal action for the VB/I-70 Superfund site.

You'll remember that Denver has plans to install an open channel drainage way to convey storm water from the I-70 project, RTD construction, and other existing sources. The channel's current alignment extends across the Coliseum property, and we have previously discussed the potential to do this work through a removal action. The channel is intended to be an amenity, ultimately linking to other green infrastructure built in the area. This meeting is intended to bring everyone up to speed on status, and discuss design concepts and review needed for that design, as constrained by Denver's need to provide drainage for the I-70 and RTD projects.

Here is a tentative agenda:

- a. Introductions, meeting purpose
- b. Review of project goals and current status updates
- c. AOC and SOW
- d. Conceptual design components
- e. Schedule constraints and possible for design, documents and review needed
- f. Any other information and action steps
- g. Next steps

Please let me know of any questions.
